

COMPACT CURRENCY COUNTER

D-100

**Easy to handle, but highly efficient
when accuracy counts most.**

Bi-VID (Billcon Visual Image Detection) Sensor provides accurate denomination recognition and sophisticated counterfeit detection ever before within its compact body. The Billcon original feeding mechanism allows to count notes in any condition, from brick to tissue-soft notes.

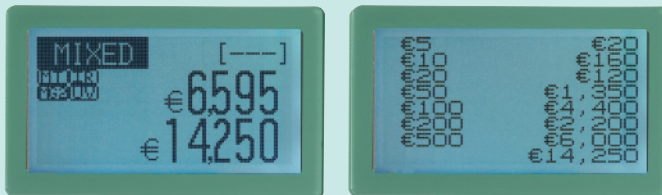

Full graphic LCD

Icon-Operation panel

To minimize your operation time and cost, the D-100 is made simple. Just place the notes on the hopper, and go. It counts and recognizes the denomination at 1,000 notes-per-minute speed with efficient counterfeit detection.

The Billcon D-100 is language-free machine with icon operation buttons. User-friendly and easy-to-use function realizes productive operation.

Amount, number of notes, grand-total and more can be displayed on the full graphic LCD.

Equipped with USB and RS-232 (DB-9) ports.
